20"x30" portrait	762x598mm	532mm	542mm	548mm	3mm	has acrylic clip for top

*Overall width of holder includes 12mm wings (and also any gaps between posters for multi-holders)

*Centres for wires or bars allows for the clamps and the thickness of the wires or bars.

It is the distance required between the centres of the wires or bars to accommodate the holder.

Holders are naturally double-sided - ie posters can be inserted back-to back to be seen on front and back.
Acrylic clips are provided for the tops of holders of sizes A2 and larger, to ensure that these do not 'open'

Holders are fabricated from clear acrylic.

Holders in toughened material (PETG) can also be provided - please enquire

Holders have single-thickness 12mm "wings" at either side to be gripped by clamps

Holders can be made to order if required - different poster sizes, 'wing' sizes, acrylic thicknesses etc

PLEASE ENQUIRE
